

SPECIFICATION SHEET

Centipede Barrier

SPECIFICATION SHEET

Centipede Barrier

PRODUCT DESCRIPTION >

Whether its for indoor or outdoor use the Centipede Barrier is a fantastic choice when cordoning off an area.

The Centipede barrier can be easily stored due to its retractable construction which allows it to fold to a width of just 400mm, once fully expanded the barrier can singularly cover areas of up to 2100mm, or significantly wider spans when connected to additional Centipede barriers.

At the front of each barrier there are two foldable latch and lock arms for connecting to neighbouring Centipede barriers, this system ensures no separation between units occurs. In addition the Centipede barrier also benefits from having eight wheels which makes for a much more sturdy base compared to rival products.

CENTIPEDE BARRIER SPEC >

Expanded	Closed	Height	Width	Weight
2.1M	400mm	1.2M	600mm	24.5kg
