Traffic Log Barrier

SPECIFICATION SHEET

Traffic Log Barrier

PRODUCT DESCRIPTION >

Tailor made for redirecting traffic and low-level containment.

Our high visibility Traffic Log Barriers are self-weighted, each Traffic Log weighs 40kg and can be moved around easily with the specially designed rope carrying handle featured at both ends. The logs measure 1m wide and 300mm deep, and can be secured easily to other logs via the slot also found at either end.

Designed to be used over and over again, these durable barriers last much longer than regular bulk timbers.

TRAFFIC LOG BARRIER SPEC >

Length	Width	Height	Weight
1000mm	300mm	300mm	40kg
