Scaffold light

SPECIFICATION SHEET

Scaffold Light

PRODUCT DESCRIPTION >

Ensure your scaffolding is safe and well lit with our robust LED scaffolding light.

The light utilizes low energy LED technology which results in unbeatable battery performance and provides a highly visible light, flashing 80 times per minute. Our scaffold lighting combines a sturdy steel construction with great energy efficiency. Each scaffolding light provides over 4000 hours (12 months) of use from two Industrial standard 'C-Type' batteries, supplied with each light.

As standard our scaffolding light is fitted with a daylight sensor, which will turn on in low light conditions to preserve energy. The light is fitted with a half swivel, and will fit all standard scaffolding. Its hard wearing reinforced plastic lens is secured using tamper resistant hex security bolts.

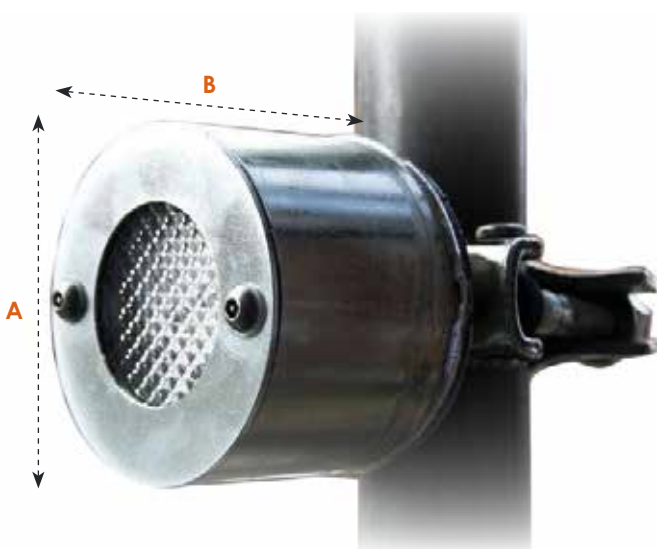

LAMP SIDE MOUNT SPEC >

Length	Width	Weight
125mm	135mm	1.5kg

KEY FEATURES >

- Low energy LED technology
- Highly visible light, flashing 80 times per minute
